SKILLS

- **Languages:** Python, SQL
- **Frameworks:** Pandas, NumPy, Seaborn, Matplotlib, TensorFlow, Scikit-learn, Streamlit
- **Core Concepts:** Applied Machine Learning, Feature Engineering, Model Evaluation, DBMS, NLP
- **Tools/Platforms:** Git, VS Code, Excel, MySQL, MongoDB, Tableau, Docker,
- **Soft Skills:** Critical thinking, Time Management, Communication skills, Curiosity, Adaptability, Collaboration

TRAINING

CipherSchools - Python Development Language with OOPs | CipherSchools

June 25 – July 25

- Acquired practical experience in core Python concepts—including data types, functions, and file handling—by completing hands-on projects
- Applied Object-Oriented Programming (OOP) principles such as classes, inheritance, and polymorphism to develop [number] scalable software projects.
- Implemented practical application through hands-on projects like building a calculator, a text-based game, and a data analysis or web scraping project.

Skolar – Cyber Security Internship Program | Skolar

Oct 23 - Dec 23

- Completed a 3-month internship focused on cybersecurity fundamentals, including network security, system protection, and threat analysis.
- Performed basic vulnerability assessment and security analysis to identify potential system and network risks.
- Utilized tools such as Wireshark, Nmap, Burp Suite, and Kali Linux for network monitoring, scanning, and security testing.

PROJECTS

Energy Consumption Prediction System | Machine Learning & Streamlit | Project

April 26 – May 26

- Developed an end-to-end Applied Machine Learning system to predict energy consumption using environmental and time-related features.
- Performed feature engineering, regression, classification, clustering, model evaluation and data preprocessing to improve prediction performance.
- Deployed the trained ML model as an interactive Streamlit web application for real-time predictions and visualization.
- **Tools used:** Python, Scikit-learn, Pandas, NumPy, Streamlit, Matplotlib, Seaborn

Django-Based Python Login System | Project

Aug 24 – Dec 24

- Developed a secure and scalable user authentication system using Django, implementing login, registration, password management, and role-based access control
- Integrated email verification and third-party logins (Google/Facebook) with Django-Allauth to enhance security and user accessibility.
- Built a responsive, user-friendly frontend with HTML, CSS, and JavaScript, ensuring seamless interaction between users and the platform.
- **Tools used:** Python, Django Framework, Django-Allauth, SQLite/MySQL, HTML, CSS, JavaScript, Git, Postman, Chrome/Edge Browsers

CERTIFICATES

- Python Development Language with OOPs – Cipher Schools | [Link](#) July 25
- Introduction to Hardware and Operating Systems – IBM (Coursera) | [Link](#) Sep 24
- Digital Systems: From Logic Gates to Processors – (Coursera) | [Link](#) Sep 24
- Hackathon Participation – Code-A-Hunt (24 Hours) – Lovely Professional University (LPU) | [Link](#) Feb 24
- Cyber Security Internship & Training – Skolar | [Link](#) Dec 23

ACHIEVEMENTS

Achieved Top 10 Rank in Code-A-Haunt Hackathon

Feb 24

Competed among multiple teams and achieved a top 10 position by collaboratively developing innovative solutions and providing critical support to team members during complex challenges.

EDUCATION

Lovely Professional University

Bachelor of Technology - Computer Science and Engineering; **CGPA: 6.35**

Sri Chaitanya College

Intermediate; **Percentage: 83.1%**

Genesis International School

Matriculation; **Percentage: 68%**

Punjab, India
